and a few more Hhg's to clean harmful frequencies in home or workplace

Cheers

A bit more info on those pyramids...in the tip a brass bead,,,,the black is titanium sand mixed in with fine brass and copper.
Auminium curls and the standard blue kyanite, selenite , black tourmaline and paramagnetic rock in thge base.
All Hhg's have oversized quartz points buried in the matrix.....cheers again !

A huge thankyou to Angela for accomodation in Wagga Wagga again, Angela makes and runs the Gourmet Soap Kitchen in Forsythe St. Quality products from natural materials that really do look after your skin...especially for people with skin problems...She also stocks a good array of orgonite pieces, from phone buttons, personal to home protection....cheers for your hospitality

Wagga Wagga scored a beefed up version of a UCB (underground chembuster) that had larger diameter pipes and Hhg's instead of Tb's

Location: The Top
End...Australia

The last shot shows almost finished before burying the lot and replacing the clump of grass
The hexagon template and steel pipe were used to align and clear the way, so to speak, before hammering home the copper pipes
These UCB's really clean up the harmful frequency from a kilometre or more away....really strong orgone field for a while till the excess EMF radiation is cleaned up, then they just tick over as needed....and nicely hidden

Wagga to Albury...a few towers and relay towers gifted and two electricity substations sorted with Hhg and Tb's

and then a huge hill top array in Albury, that had easy access as a lookout area ...and what a view !

These were the Hhg's...very plain but very effective

Then on entering Victoria, greeted by sylphs leading the way....now that was exciting

It's nice to know that there are friendly people somewhere out there who know what's up. I've never thought of the crystals in the ground like that, that's a good idea. I don't have any experience with those crystals. Do you have any cheap for sale over the Internet that I can buy?

What's the price range on those things? What about those gift ones in the bucket?

G'day TruthStillStands....postage to the US is a bit of a limitation due to the weight issue(the orgonite is loaded with metal !)...Here in Australia, forum members can get a 3 kilo bulk express bag for \$120....
However, I have send 3 or 4 parcels to the States...works out same price \$120au, but around the 1 kilo mark....included would be a large home size Hhg and whatever I can stuff in...Tb's, pendant, phone buttons etc
There are plenty of orgonite vendors in the US as well...do a google search
Still....more than happy to send you some nice ones if you can afford it
Cheers

Set up the CB and busted a couple of local towers.
The next day reward.....beautiful sunset sylph activity

Pays to have a bit of orgonite around....sylphs love an orgone atmosphere....they happily clean up the sky

Then, today, Cathy Walker's new orgonites demoulded to bring in a sky full of sylphs

Exciting times

Play time.....these two experiments made in spherical ,glass light fittings , which were smashed to reveal the globe shaped orgonite when hardened....the second one was huge and weighed a ton , so to speak

A few heat cracks but came out OK
Looking for another sacrificial light fitting, but smaller ..Ha
